Kratek opis

Product description A MUST-HAVE TOOL for welders! Featuring a 360-degree adjustable protractor dial bubble the level has two cast-in 25-pound magnets to securely hold the unit in place on any steel surface including the underside of a pipe or beam. This permits hands free leveling, even in the tight spots. The bubble is mounted on a protractor dial, so it can be used in any position and still maintain accurate readings. Both faces of the level have deep, cast-in grooves for self-centering on the contour of the pipe and because the magnets are cast-in, they won’t interfere with the use of the level on nonmagnetic materials. For aligning pipe flanges (two holing,) the universal level comes with a two threaded, self-aligning conical spacer and conical nut and bolt units. Used for bolt holes from 6 mm to 42 mm with center distance from 50 to 250 mm Length 230 mm
